# Création d'un flux pour effectuer un suivi sur les technologies proposées pour le site (veille passive)

The screenshot displays the Feedly AI web interface. On the left, a sidebar contains navigation elements: a green hexagonal logo, a list of feeds under the heading 'FEEDS', and a list of boards under 'BOARDS'. The 'FEEDS' list includes 'All' (122 items), 'Old project' (35 items), and 'Qwenta \_suivi technologies' (64 items, highlighted in green). Below these are several individual feeds like 'Auth0 Blog', 'Hacker News - Newest: "jav..."', 'Human Coders News : Java...', 'Journal du hacker: javascript', 'MongoDB | Blog', 'Ninja Squad', 'Node.js Blog', and 'We Work Remotely: Back-E...'. The 'BOARDS' section shows 'Qwenta' and a 'Create New Board' option. The main content area features a blue 'Upgrade' button at the top. Below it, the feed title 'Qwenta \_suivi technologies' is displayed in large, bold black text. To the right of the title are interaction icons: a checkmark with '64', a star, a share icon, a group of people icon, a list icon, a heart, a refresh icon, and a more options icon. Under the title, the word 'LATEST' is centered. Three article cards are visible: 1. A card with a placeholder image and the title 'Compile and Run C in JavaScript' from 'Hacker News - Newest: "javascript" / 3h'. 2. A card with an image of a delivery person in an orange 'Ahameove' uniform and a woman, titled 'Ahameove Rides Vietnam's E-commerce Boom with AI on MongoDB' from 'MongoDB | Blog / 16h'. 3. A card with the 'Kuali' logo and title 'Kuali, Inc.: Software Engineer - Financials (Full-Time 18 Month)' from 'We Work Remotely: Back-End Programming J... / 20h'.
